

Milk Powder Screw Filling Machine MZH-F 30A

This Milk powder screw filling machine adopts screw filling and electronic weighing feedback measurement method, and combined with PLC control.

This Screw Filling Machine can filling 10-5000g powder of different weight. If you need to fill powder of different weight in a large range, you can replace the screw rod. You don't need to buy another powder filling machine, you just need to buy the screw rod. Usually this kind of powder filling machine works with the screw feeder.

Optional configuration:

1. The dust removal device
2. Pneumatic the stanch valve device
3. Leakproof centrifugal device
4. The weight returns, said device
5. Foot switches and photoelectric feeding device on the radio.

Technical parameters:

Packaging weight	10-5000g (Change the screw)
Packing accuracy	$\leq 100g \leq \pm 2\%$ $100-500g \leq \pm 1\%$
Filling speed	40-120times/min
Power	three-phase 380V 50HZ
Total power	1.4KW
The wholeweight	140KG
Whole volume	L1000×W800×H1900mm
Hopper volume	50L
