

## *BGF18-6 Automatic Beer Filling Capping 2 In 1 Machine*

This Automatic Beer Filling Capping 2 In 1 Machine is mainly used for glass bottle crown caps of beer filling and sealing. It is 2 in 1 machine, composed of beer filling and crown capping. The machine adopts international advanced technology, it's design scientific and reasonable, appearance is beautiful, operation and maintenance is convenient, and it's high degree of automation, so it is the good machine for middle and small beer manufacturer.

### **Features:**

1. Screw feeding for glass bottle, it's more stable.
2. High precision mechanical filling valve, no bottle no vacuum pumping.
3. Famous SIEMENS brand PLC, and all the other electrical and pneumatic parts are world famous brand.
4. The liquid level is controlled by electric probe to assure the filling precision.
5. Italy technology capping heads ensure high capping speed and capping precision.

### **Technical Parameters:**

Model	BGF12-6	BGF18-6	BGF24-8	BGF32-10
Filling heads	12	18	24	32
Capping heads	6	6	8	10
Capacity based on 500ml glass bottle	1000-2000BPH	2000-3000BPH	4000-5000BPH	6000-8000BPH
Motor power (KW)	1.5	1.5	3.75	5.6
Dimensions(mm)	1700*1100*2300	1830*1320*2300	1950*1580*2500	2100*1850*2500
Weight (KG)	2000	2400	3000	3500
