

JC-CTM Automatic Horizontal Cartoning Machine

This machine completes product insertion, leaflet insertion and production batch & expiry date coding in one run. Also equipped are malfunction warnings for fail safe packaging processes. It is labor saving, suitable for pharmaceutical, ointment or cream tubes, cosmetics, hardware, stationary, etc.

Starwheel

A starwheel is equipped for bottle separating from each other and for precise loading on conveyer. It is only to replace a new starwheel for other bottle sizes.

Steel type wheel

To print manufacturing date, expiry date and batch numbers, a durable steel type wheel is adopted to emboss such information on carton.

Insert

By using a vacuum cup and a gripper, the insert is pushed precisely into the carton. The machine stops when there is no insert so as to avoid product missing with insert.

Technical Parameter:

Model	JC-CTM
Speed (n/m)	20-70
Power Source(VAC)	220V/single phase 50HZ/60Hz
Power Consumption (kw)	1.5
Air consumption (min)	4-6kg X 2 Liter
Machine Weight (kg)	550
