

Flour Electronic Quantitative Powder Packing Machine GQ-25F/50F

- Adopting frequency conversion control control, feeding screw, adapt to flow speed of material, fast packaging, high precision.
- Use barrel structure, the height of machine is low, take up the space is little, cooperate with sewing machine is low, take up the space is little, cooperate with sewing machine that could be raised or lowered, the machine is multi-purpose.
- Special designing is take bag device, sealing mechanism, suitable for packing powder materials.
- It can set control parameters and correct head automatically, out-of-tolerance alarm, fault diagnosis automatically, etc.

Technical Parameters:

Model	GQ-25F	GQ-50F
Filling range	15-25kg	25-50kg
packing accuracy	0.1%F.S	0.1%F.S
power specification	1,5kw/380v 50Hz	1,5kw/380v 50Hz
Air supply specifications	1.0m ³ /min/0.4-0.8Mpa	1.0m ³ /min/0.4-0.8Mpa
Dimension	750*1360*2090mm	750*1360*2380mm
