

Pyramid Nylon Tea Bag Packaging Machine LGLB-3

Pyramid tea bag packaging machine is a automatic tea packing machine, it is widely used in food, medicine, biological products and other small three-dimensional packaging, such as black tea, green tea, barley tea, health tea can be very good packaging. Most importantly, this machine price is best.

The packaging of pyramid tea bag packing machine can play a good role in protecting the product, waterproof, moisture-proof and so on.

Features of Pyramid Tea Bag Packaging Machine

1. Pyramid tea bag packing machine is compact and reasonable in structure, stable and advanced in performance, simple in operation.
2. Multi-function digital display frequency converter is adopted, and the packaging speed can be infinitely variable.
3. Machine equipped with a variety of molds can achieve a machine packaging a variety of products, effectively improve the utilization rate of the machine. And die replacement is simple, can save production time effectively.
4. The transmission part of the machine is equipped with various protective devices and fault warning system. When problems occur in the operation of the machine, the machine can automatically detect and alarm, which can effectively reduce the occurrence of accidents and make the operation of the machine safer.
5. No packaging materials shall be removed from the film without waste of packaging materials.
6. Pyramid tea bag packaging machine can be equipped with photoelectric tracking and coding machine to design new models according to users' needs.

Technical Data:

Model	LGLB-3
Capacity	35~55 bags/min
Measuring Method	volume measurement
Packaging Weight	3±0.5 g/bag (can be customize)
Material Roll Inner Diameter	Φ76mm
Dimension	1200*900*1800mm
Air source	≥0.6Mpa
Power	220/380v,1.2kw
Packaging Sharp	Triangle and quadrangle
Packaging Material	Nylon, non-woven fabrics etc.
Material Width	140mm (can be customize to 160mm,180mm)
Material Roll Outer Diameter	≤Φ400mm
Weight	700kg
