

## AF-FS Coffee Pouch Machine for Capsules Pouch Filling Sealing

### Features

- AFPAK coffee pouch machine is made special to handle varieties of packaging jobs of preformed pouches. Features with compact design in single station working and touch screen easy setting, loading bag on a top cassette with easy adjustment function, would smart suit to Multi-size handling by one machine
- System control by PLC, motions drove by Cylinders, used suction cups to do typical motions of picking & transferring, opening bag step by step, easy known how to operation and maintenance.
- Multi combined able with varieties of dosing tools for varieties of packaging needs in real, suit with such as Multi-head scale, linear scale, auger filler, cup filler, liquid pump and so on, for food or none food.
- AFPAK coffee capsule pouch filling sealing machine is a mini conception by offering a modest level of packing speed from 6 to 15bags/min only so can be one thing in economic investment to get. Save money enough to operate by those small or medium users who meet needs to upgrade his packaging jobs but limited productions output in fact, in case they do not spend huge amount to get a big stuff but overflow his output level in deep.

### Product Parameter:

Model	AF-B10
Machine size	L1630-1750mm*W510-750mm* H1300-1650mm
Speed	6-30 bags/min
Filling range	10/20/30 pcs/bag
Bag size	W 80-300mm*H 150-430 mm
Voltage	Can be customized
Air pressure/gas consumption	≥0.7m <sup>3</sup> /min 0.65MPa
Machine weight	160-220Kgs
