

## WP-M-series Dry Powder Mixing Machine

The dry powder mixing machine is a new type, high efficiency mixing equipment, are widely used in food and chemical industry. Horizontal tank body, need small space but more capacity.

### Product feature and application

1. The dry powder mixing machine horizontal tank body, need small space but more capacity.
2. Dual screw structure-The inner screw push the material from central to sides and the outer screw push the material from sides to the center to make the material effective mixing.
3. Gear box drive the auger shaft, low noise and low malfunction, long using life
4. U-Shape tank bottom, better for material discharge and cleaning
5. Pneumatic cylinder to control the discharge exit. 6. Gas pressure spring help the top cover easy open.

### Application:

The Horizontal Screw Belt Mixer is a new type, high efficiency mixing equipment, are widely used in food and chemical industry.

### Product Specification:

Model	WP-M200	WP-M300	WP-M500	WP-M1000	WP-M1500	WP-M2000
Mixed Volume	200L	300L	500L	1000L	1500L	2000L
Full Volume	280L	420L	420L	1280L	1850L	2400L
Time	0.01S-99H					
Overall size	140*90*145	153*10*155	170*120*170	200*130*196	240*140*205	265*152*220
Total Power	4.5kw	5.5kw	7.5kw	11kw	15KW	22kw
Total weight	250kg	350kg	500kg	700kg	1000kg	1000kg
