

SJ-2000 Sachet Sealing VFF Packing Machine

SJ-2000 Liquid packing machine widely used to pack milk, soybean milk, sauce, vinegar, yellow wine, all kind of drink with film. The whole process can be accomplished automatically, such as ultraviolet sterilization, bag figuration, date printing, quantitative filling, enveloping, cutting, counting, and so on. The temperature of heat-sealing is controlled automatically, the production is beauty and fastness, the machine adopts stainless steel shell, and the sanitation is guaranteed.

Features:

- All parts of sachet water filling sealing machine are made of stainless steel.
- Adopting self-priming pump quantitative filling, direct heating sealing and cut off.
- The adjustment of bag size, packaging weight and cut temperature is convenient and reliable.
- Production date ribbon print, and at the letters, dorsal closure, electro-optical tracking.

Technical Parameter:

Type	SJ-2000
Bag length	50~250mm
Bag width	40~175mm
Film width	100~380mm
Packing capacity	200~1000ml
Power	2.5kw
Dimension	1050*850*2050mm
Weight	380kg
