

Carton Packing Machine

Carton packing machine is especially suitable for bag and bottle products with large specifications.

This carton packing machine is a multi-functional product integrating light and electricity developed. It can automatically and quickly pack aluminum plastic board, electronic cigarette, facial cleanser, ointment, soft bag, bottle, powder, granule bag, condom, soft double-layer aluminum, gypsum, coffee, mask and etc.

It is high integrated, which can be connected with tail sealing machine, aluminum plastic blister packing machine, strapping machine according to customers' production requirements.

Technical parameter

Encasing Speed	30-80box/min
Box Quality Requirement	250-350g/m ² (according to customer request)
Box Dimension Range	(55-200)mm X(14-90)mm X(13-65)mm
Compressed Air Working Pressure	≥0.6mpa
Air Consumption	20m ³ /h
Power Supply	380V 50Hz
Noise	≤80dB
Motor Power	1.5KW
Leaflet Unfolded leaflet specification	L (80-250)mm × W(90-170)mm
Fold range	(1-4) fold
Machine Dimension	3800X1100X1900mm
Environment temperature	25±10°C
Machine Weight	1500KG
