

## *PAPF-1000C Automatic Piston Filling Machine*

This type of machine is suitable for semi liquid and cream without gas. It automatically counts inlet bottles, quantifiably fills each bottle, and delivers outlet bottles. It is especially good for filling SL, EC, SC, Edible oil, lubrication. This filler is an ideal choice for foodstuff, pharmacy cosmetic chemical, and pesticide factories.

### **Features:**

1. This filler adopts PLC to control the filling process. Touch screen control panel makes it easy to set. It has wide application.
2. The filler takes advantage of the advanced Mechanic Electronics technology. You can change the packing specifications by changing parameter on the touch screen. Not only all the 12 filling heads can be regulated, but also each filling head can be regulated respectively.
3. Touch screen technology makes the machine more reliable and handy as a friendly man-machine interface. Photoelectricity sensor, approximate switch and other elements are of international famous brand, it ensures no bottle miss filling. It will alarm if the bottle is blocked.
4. It uses diving method to fill bottles; You can choose different sealing rings to meet different filling material.
5. It meets the GMP requirements, it is easy to disassemble, clean and maintain. And the parts which contact with the filling products are made of high quality stainless steel. The whole machine is safe, eco-friendly and sanitary. It adapts to several working places.

**Technical Specification:**

Volume	100-1000ml
Filling accuracy	±0.5%
Filling speed	around 6000 bottles per hour
Supply Power	1P 220V 50-60Hz 2500W
Size	4000*1400*2200mm
Net Weight	650KGS
