

Automatic Capsule Filler & Encapsulation Machine NJP-1200C

NJP-1200C automatic capsule filler processes the products for optimal productivity up to 1200 capsules per minutes, featuring low-maintenance operation, minimal downtime, and overall dependable production.

With the development of the pharmacy machine's technology, how to improve the automatization process of pharmacy machine and the efficiency of the produce become more and more urgent. In order to meet the requirements of the pharmacy machine's development, we design and produce a fully enclosed automatic capsule-filling machine on the basis of the former NJP-series machine. This machine's structure, power supply controlling, vacuum and aspirate system are all ameliorated innovatively. We can say it is really the most advanced machine in the pharmacy machinery producing line. Generally speaking, it is the machine which concentrating the structure, electric and air to a body.

The machine equipped with the various segments for suitable capsules, namely 00#, 0#, 1#, 2#, 3# and 4#.

Specifications

Machine model	NJP-800C	NJP-1200C
Max capacity	48000capsules/hour	72000capsules/hour
Suit for capsule size	00#-5# and safety capsule	00#-5# and safety capsule
No.of mould bores	6	9
Power	380V,50Hz,5.05kw	380/220v,50/60Hz,6kw
Noise	<75dB	<75dB
Machine dimensions	1080x1240x1930mm	1180x1340x1980mm
Net weight	800 kg	1000kg
