

## *ZH-CZ1 Z Type Material Hoister*

The conveyor is applicable for vertical lifting of granule material such as corn, food, fodder, plastic and chemical industry, etc. For this machine, the hopper is driven by the chains to lift. It's used for vertical feeding of granule or small block material. It has advantages of large quantity and height lifting.

### **Technical Parameters:**

- Conveying Height: 2.5-3.8m
- Conveying Volume: 2.5-5CBM/hour;
- Dimension(mm): 3100L\*680W\*3850H;
