

## *SWP240 Automatic Cartoning Machine*

SWP240 Automatic Cartoning Machine is automatic balcony-style packing machine in continue movement. It is mechanical and electrical integration, auto-complete pile of blisters. Blister detach and transport, carton open, transport, seal, and leaflet fold and transport, put blisters and leaflets into carton, automatic embossing lot numbers and others moves. Automatic Cartoner. Production Line Series. Standard Configuration : Main machine, Man-Machine Interface, PLC and Stainless Steel Cover. The machine adopts PLC to control the whole test. Modern human-interface, can display the operation screen, set the operating parameters and automatic alarm, is an intelligent product. Compact structure, beautiful appearance, reasonable layout, convenient operation, easy adjustment and maintenance. Adaptable, reliable performance. Low noise, it is conducive to improving the working environment and working condition. In accord with GMP standard.

### **Technical Parameters:**

<b>Model</b>	<b>SWP240</b>
Production Capacity	50-150 Cartons/min, 1-6 blisters/carton
Box Quality Requirement	250-350 g/m <sup>2</sup> (according to client request)
Carton Dimension	L 85-150 mm, W 40-80 mm, H 15-70 mm
Cartoning Material Dimension	L 65-145 mm, W 25-90 mm
Tab (Manual) Standard	40-70 g/m <sup>2</sup>
Dimension	Max. 260*180 mm Min. 110*130 mm
Air Consumption	50 L/min
Power	380V,50Hz, 3Kw
Packing Size	3700*1600*2000 mm
Packing Weight	2800 Kg
