

CK-ZC420F Pouch Detergent Washing Powder Packaging Machine

This Detergent powder packing machine | Powder Soap Packing Machine is economic and practical, which is suitable for packing powder and small particles, such as milk powder, detergent, spice powder, coffee powder, fruit powder, wheat flour, plantain flour, tea powder, etc.

Detergent pouch packing machine is economic and practical powder and granules of automatic filling machine, quantitative packing machine, adopt servo motor (or step motor), PLC and touch screen control, simple operation, high stability, can with the feeding machine, sealing machine and other components of a complete set of semi-automatic filling lines, suitable for packing powder and small particles.

Technical Features:

- ★ This machine can achieve full automatic powder packing.
- ★ All the machine parts in contact with raw materials are made of 304 stainless steel.
- ★ The auger screw filler rotary dosing driven by servo motor, which ensure the accurate filling.
- ★ Material conveying, measuring, filling, bag-making, date-printing, finished product outputting are all completed automatically.

Technical Data

Model	CK-ZC420F
Air consumption	2.5m ³ /min.6kg/cm ²
Max. film width	120-380mm
Bag length	80-240mm
Bag width	50-180mm
Max. film roll diameter	Max.300mm
Packing speed	5-70bags/min
Packing thickness	0.04-0.08mm
Power supply specification	220V.50/60Hz.2.4KVA
Dimension	(L)880*(W)810*(H)1350mm
Total weight of machine	350kg
