

GF60 Aluminum Tube Filler Sealer

Features:

- The transmission part is closed under the platform, safe and no pollution.
- The Loading and Sealing part is installed in the semi-closed and no static electricity
- Visible cover above the platform so it is easy to observe and operate.
- PLC and touch screen control, human and machine conversational color interface.
- Optional sloping and vertical tube storage.
- The upper tube rail automatically feed the soft tube into the upper tube working station.
- The photoelectric target-aiming working station employ accurate detector and marching type motor, ensuring the tube design at the correct position.
- When filling is finished, the end is blown away by the air blower.
- No feeding is done when there is no tube available.
- The sealing manipulator is flexible and multi functional. Through different adjustment, it can accomplish the operation of two edge folds, three edge folds, three edges folds and saddle-shaped edge folds.

Technical Parameters:

Model	GF-60
Applicable	Aluminum Tubes
Max. Production Capacity (tubes/h)	3000
Filling Volume (ml)	5-250
Filling Error	≤±1%
Suitable Tube Length (mm)	50-240
Suitable For Tube Diameter (mm)	Φ10-50
Power Supply	380V/50Hz/3P
Main Motor (kw)	1.1
Overall Dimensions (mm)	1900×850×1900
Weight (Kg)	850
