

YG-1/2 Automatic Cap Snapping Machine

Used for plastic caps feeding, sorting, dropping and capping automatically.

- Strong compatibility, suitable for a variety of cap types, various specifications, various materials of round bottles, flat round bottles, square bottles, flat square bottles.
- Main functions: one-stop automatic completion of cover arrangement, cover fitting and cover pressing, and targeted cover arrangement can be designed according to different cover types of customers.
- Continuous quick gland.
- It has many detection and alarm control functions, such as no bottle, no lid, no work, fault self-check and so on, to ensure the continuity of production and the accuracy of gland.
- Automatically adjust the capping and capping state to reduce the collision and friction between the caps without damaging the caps.
- Fully automatic operation, intelligent joint control with upper and lower equipment, good coordination, no special operation, saving labor.
- Chinese or English control panel, according to the production requirements for parameter setting, modification, storage, adjustment, especially convenient to use.
- The control chip is originally imported from the United States, and the photoelectric sensing component is produced in Taiwan, which is stable and durable.

Technical Parameters

Model	YG-1	YG-2
Max Capacity	30-150 BPM	30-150 BPM
The power supply voltage	220V/50HZ 1.2kw	220V/50HZ 1.5kw
Size	2400×1050×1850mm	2400×1550×2400mm
Main material of equipment	SS304	SS304
Control system	MCU	MCU
Compress Air	0.6 Mpa, 150L/min	0.6 Mpa, 100L/min
The weight	280kg	650kg
