

LD-8200A/8240A/8300A Premade Pouch (Doypack) Filling and Sealing Machine (8 Working Stations)

The machinery has a wide range of packaging. According to different packaging materials, different metering and filling devices can be selected to package various solid materials, liquids, sauces, powders, particles and other materials.

Features:

1. The automatic rotary packing machine is equipped with a precision indexing device and a PLC to control each action and work station to ensure that the machine can operate easily and accurately.
2. The speed of this machine is adjusted by frequency conversion according to the range, and the actual speed depends on the type of products and package.
3. Automatic checking system can check bag position, filling and sealing status.
4. The parts in contact with the product and the bag are made of stainless steel and other advanced materials, which guarantees the hygiene of the products.

Specification:

Model:	LD-8200A/ 8240A/ 8300A
Bag Size:	W: 100-300mm L: 100-450mm
Filling Volume:	10-2500g (Depending on type of products)
Capacity:	80-120 bags/min (The speed depends on type of products and packaging material used)
Package Accuracy:	Error \leq ±1%
Compress Air Requirement:	\geq 0.8m ³ /min supply by user
