

HDL-K60C Fine Grain Automatic Packaging Machine

Apply to granule, desiccant, monosodium glutamate, sugar, cereals, etc.

Features

1. In both Chinese and English display control system, stainless steel case, just at the display setting unit set the parameters (filling amount bag length, etc.), control system will automatically optimize match the actions, so as to achieve the best packing speed.
2. Stable dual light source photoelectric check system, assuring complete logo of the packaging bags.
3. The intelligent temperature control instrument control. Automatic measuring, bag making, filling, sealing, printing, batch number, cut off and counting, etc. All the work, using three or four edge sealing edge sealing double-side heating heat sealing mode.

Specifications

Model	HDL-K60
Meter method	50-100ml
Bag size	(L)30-120mm (W)25-100mm
Packaging speed	40-60bag/min
Power	1KW
Shape of sealed bags	3 edges sealing 4 edges sealing
Weight	About 215KG
External demensions	(L)640*(W)700*(H)1580
Filler type	Volume measuring cup
