

YNYT-4 Orange Juice Filling Machine

Orange juice filling machine is a type of liquid filling equipment that is used for bottling organic fruit juices and concentrates, fruit juices with additives, smooth fruit juices or those with pulp etc. It typically operates through a series of steps, including filling, capping, labeling, and packaging. Juice liquid filling machines are commonly used in the beverage industry for large-scale production and are available in various types, including automatic, semi-automatic, and manual, to meet different production requirements.

Features

1. Pneumatic Filling System: Simple And Easy Clean.
2. All Material Contact Parts Are Stainless Steel 304. SS316L Is Optional.
3. Touch Screen With PLC System.
4. Wide Filling Range: 50-5000 ml.
5. Low Cost With High Production Capacity.

Technical parameter

Machine Model	YNYT-4
	orange juice filling machine
Voltage	220V/110V 50-60Hz
Power	About 200W
Filling Range	100-1000ml(Can be customized)
Filling Speed	About 30-70 bottles/min
	(depending on bottle size and filling material)
Filling Error	About±0.5%
Air Pressure	0.5-0.8Mpa
Conveyor Belt Size	About 114*2000mm(W*L)
Machine Weight	About 200kg
Package Size	About 2070*800*1670mm
Package Weight	250KG
