Automatic Face Cream Body Lotion Engine Oil Hot Sauce Jam Rotor Pump Paste Filling Machine Packaging Equipment

This filling machine is controlled by the servo motor, it can realize the quantitative filling, operator enters certain number by control panel can set filling volume, it is no need to adjust filling time and speed. The rotor pump is an ideal choice for filling thick paste like jam, honey, shampoo, lotion, the high filling accuracy makes it get a lot of popularity.

Main Feature

- ▶ Quantitative filling, operator enters certain number directly to set filling volume.
- ▶ With rotor pump, it can fill viscous liquid quickly and accurately.
- ▶ Can work with capping and labeling machine to realize automated production.
- ▶ The bottle blocking function can be turned off or not according to the operation.

Parameter

- Voltage: 220V/110V 50-60Hz
- Power: About 230W
- Machine Pump: Rotor Pump
- Minimum Filling Range: 50-1500ml
- Filling Speed: About 25 bottles/min(based on 500ml water, depends on bottle size and liquid)
- Filling Accuracy: $\leq \pm 1\%$
- Filling Nozzle Diameter: OD 25mm
- Suitable Bottle Height: 30mm-235mm
- Suitable Bottle Diameter: 30mm-110mm
- Hopper Capacity: About 30L
- Machine Size: About 1880*760*1510mm
- Machine Weight: About 95kg
