

NJP-3800B Full Automatic Capsule Filling Machine

Feature:

1. Improves the module turntable the internal structure, using the Japan imported linear bearing, ensure equipment's accuracy and service life.
2. Main transmission shafts bearing block can splits, easy for maintained and fix. Groove wheel dividing mechanism, accurate indexing, and long service life.
3. All drive cams is using high quality material to make into indentations cam, resist abrasion, steady working, long service life.
4. High-precision drive system is stable and reliable
5. Electronic control system using Japan Mitsubishi inverter driving, steeples speed regulation Japan Mitsubishi PLC program control, accurate action. Safe and reliable, at the same time having feeding, automatic feeding two functions optional.

Technical Data:

Model	NJP-3800B
Production efficiency	3800 Capsules/Min 228000 Capsules/H
Index table	12 partition, Seal type
Row	Double
Capsule size for powder	00#~5#
Capsule size for pellet	0#~4#
Hole number	28
Dividing device	Groove Wheel
Main Motor	1.5 KW
Total power	7.15 KW
Weight for main machine	2300 kg
Dimension of main machine	1365×1185×2027
Annex machine	XCL-36 Cleaner
Vacuum pump	1.5kw water ring pump
