

## *Automatic Sleeve Labeling Machine STC250*

### **Machine characteristics:**

1. Advanced servo motor control synchronous knife system, so that long knife life, high precision tag;
2. The efficient production rate: standard bottle production per minute to achieve 200 bottles, with the production line full connection operations, or stand-alone operations;
3. High stability of the mechanical structure: the whole machine with stainless steel shield frame and aluminum alloy steel structure, solid does not rust;
4. Multi-bottle type of flexible choice: the machine can be tilted head, round sets of bottles, square bottles, oval bottles, bottles and bottles;
5. Automatic cutter positioning system: exclusive design as long as touch the screen, that is automatically search origin positioning, safe and convenient;
6. The unique synchronization Cutter: within the specifications, free cutting knife seat. If you need to change the specifications, 2 minutes to quickly complete;
7. Simple and safe operation: the use of color man-machine control interface, in English operation, convenient and simple, the aircraft operating without personnel care, with warning device, safe and easy operation.
8. Low maintenance costs of supplies: The machine uses low-cost discarded blade, easy to replace, low cost;
9. Long tool life: mechanical steel body connected to the drive, the first reciprocating cut off, tool use time to double;

**Technical Parameters:**

Productivity	50-200BPM
Bottle material	Glass, metal, plastic
Label length	25mm -280mm
Label thickness	0.035mm -0.08mm
Bottle height	PVC.PET.OPS
Bottle height	15mm -320mm
Bottle diameter:	30 -120mm
Bottle shape	Round, square, oval, rectangular
Diameter of membrane material	48 -185mm
Host size (L x W x H)	2000L x 950W x 2000Hmm
