

Automatic Pharmacy Box Banding Machine WK04-30AM10

The WK04-30AM10 Automated Banding System will bring ease to your packaging line by neatly banding your small boxes / packages in easily handle able bundles. The WK04-30AM10 uses a dual conveyor belt setup to automatically stand boxes / packages up and accumulate them into the automatic pusher. The pusher then feeds the boxes / packages into the banding machine and applies a nice secure band.

- Bands products with Paper Tape or Plastic Film
- Completely automated and highly efficient process
- Automatically stands boxes / packages on edge for more efficient space usage
- Automatically accumulates and batches boxes / packages
- Pneumatically operated pusher
- Adjustable conveyor speeds and pusher size
- Easily adjustable side guides
- 6.25" Schneider touch screen make job setup easy
- Four Casters on the WK04-30AM10 increase its mobility
