

PH Series

Multilane Stickpack Machines

OVERVIEW

The Inever PH Series of machines form, fill and seal **three side seal stickpacks** for **powders, granulates, liquids and pasty products** for **dairy, food, cosmetics and pharmaceutical industries**.

The PH Series features a closed main frame and is driven by **servo motors** engines. The reel is enclosed inside the cabinet to dust from entry. The machine is manufactured according to the most demanding rules in order to comply with the most strict norms and rules.

Visión de conjunto

PH es una máquina multipista VFFS /stick pack para los productos polvorientos, granulados, geles y líquidos, especialmente para la industria lechera, alimentación, cosmética y farmacéutica.

Tiene una construcción separada por cabinas y predispuesta para la presurización e integración de flujos laminares. El accionamiento de los grupos se pone en marcha mediante servomotor. La máquina se fabrica de acuerdo con las normas más exigentes con el fin de cumplir con las normas y reglas más estrictas.

Matrix is an exclusive distributor for Inever and markets, sells, and provides extensive technical support, including service and spare parts throughout North and South America.
