

SY-RM Rocking Mixer

Feature:

- It is the best rotary and rocking machine. It becomes the smart technology by modifying from the principles of V-type, U-type, diagonal-type and double cone mixers.
- The principles of mixing is the trend body equipped with a simple blade to enhance mixing when it mixes. Instantaneously, the think body will rock by left-right and up-down, to make the material move inside the tank body, to reach mixing quickly and fully.
- This machine can incline to unload by manual button within 3~5 minutes.
- This machine is small-space occupation, silent and safe. And it is most available in the GMP food plant and pharmaceutical plant because the tank body is simple and easy to clean.

Usage:

Fertilizer, animal feeds, chemicals, and electronic materials powder grain mixing.

Specification:
