

Automatic Tube Filling Machine

Products like creams, paint, toothpaste, chemicals, and ointments are sold in the market in tubes. The product is filled and packed in tubes in industries with the help of an automatic tube filling machine. There are other uses for the machine like filling of medicines, gels, cosmetics, adhesive and other materials filled in tubes. The machine fills and seals the tubes in one process only. Manufacturers and suppliers who need the automatic tube filling machine for the packaging of their products can get it from Vista Techno pack machines, the top sellers of high-quality industrial machines. The tube filler machine can pack tubes of a small size as well as tubes of a large size. It can handle tubes of all shapes. A compressed air mechanism in the machine helps in cleaning the tube before the product is put inside it. The filling system is very accurate with no chance of errors and mistake making the tube filling process very precise and error-free.

Product Details:

Brand _____	VISTA
Capacity _____	60TPM
Power Consumption _____	2.5Kw
Machine Type _____	Automatic, Semi-Automatic
