

## *Powder Packing Machine with Screw Metering XY-800FJ*

### **Characteristics:**

- 1) This machine uses screw metering machine to complete the measurement and filling, etc., which is suitable for metering powder materials;
- 2) Adopting servo drive system, so it has the advantages of high accuracy and stable performance;
- 3) The stainless steel open type material box is easy to clean up;
- 4) This machine is equipped with safety protection, in line with the requirements of enterprise safety management;
- 5) Adopting intelligent temperature control, accurate temperature control to ensure the packing seal is nice and smooth;
- 6) The super display touch screen constitutes the driving control core, which maximizes the control accuracy, reliability and intelligence of the whole machine;
- 7) The metering configuration can automatically complete the packaging process of metering, feeding, filling bag making, inflation (exhaust), date printing, and automatic counting;
- 8) The packaging styles are diversified, the three side sealing bag type or back sealing type bag type can be switched to use.

## Technical Data:

Machine Model:	XY-800FJ
Filling range:	5-350g (customizable)
Accuracy:	1%-5%g (Depending on material form)
Packing speed:	40~50 bags/min
Packing material:	PE composite film and other heat sealability materials
Measuring method:	Screw Metering Way
Packing roll width:	≤ Φ 380mm
Roll outer diameter:	≤ Φ 320mm
Roll inner diameter:	Φ 76mm
Bag Size:	Width ≤190mm*M (No More Than 280mm)
Air pressure:	≥ 0.6Mpa(the gas will be supplied by the buyer)
Operate person:	1
Motor power:	Approximately 1.8Kw(220v)
Dimension:	Approximately L 1200×W 800×H 1850(mm)
Machine weight:	Approximately 350kg
