

Capsule Counter Filler

Packry's tablet and capsule counting and filling machine is a hot-sale equipment that can pack all kinds of tablets and capsules (transparent or opaque hard capsules, soft capsules, pills, etc.) in the range of 3-12 mm. Meet the requirements of GMP, suitable for scientific research institutions, hospitals, small and medium-sized pharmaceutical factories, health products factory production packaging.

Features:

1. High accuracy. The accuracy rate of several canned grains is more than 99.5, which is higher than the industry standard.
2. The flip-flop subassembly mechanism obtains the national patent, does not damage the material when opening and closing.
3. Good stability. Using the electronic counting technology of high dust resistance, it can still operate normally in high dust environment.

Specification:

Configuration	Counting photoelectric head	1	Japan Omron
	CPU	1	ST
	PLC	1	Delta
Main performance parameters	Max. Production Capacity	/	40 bottles/min
	Button	1	Schneider
	Motor	1	Taiwan TQG
Finished product parameters	Filling range	grains	янв.99
	Applicable bottle type	ml	10-500 (round/ square bottle)
	Powdwe density	g/ml	0.66-1.2
