

Horizontal Labeling Machine Without Conveyor SL-5314

Features:

1. High-precision stepper motor, torque up to 8 cattle meters, labeling speed of up to 30 m / min.
2. Two-stage clutch design, the label tension more stable, easy to improve the labeling accuracy.
3. Advanced man-machine interface control system.
4. The name factory PLC control, high reliability.
5. Wheeled design, easy to move to different occasions, rapid adjustment, for any product to achieve automatic labeling.

Parameters:

- producing speed: 30-50 min/ meter
- labeling accuracy: $\pm 1\text{mm}$
- label max width: 100mm
- label inner diameter: $\phi 76\text{mm}$
- label outer diameter: $\phi 300\text{mm}$
- outline size (LxWxH: L1000xD650xH1600mm
- using power: 220V 50Hz 1000W
-
