

Electric Driven Automatic Box Filling Machine ZXZB1A12

Automatically finish the process of opening, molding, filling, packaging and sticking tape for the cartons.

Advantage

1. Complete modular design to be convenient layout based on actual usage of customer's site.
2. All the electrical control components and PLC are used by international famous brand to ensure the accurate and stable operation as well as the packing quality.
3. The unique box positioning system can be ensured box successfully entering the preset stations.
4. The machine is modular designed and each module is independent controlled. They are relative independent, interchangeable and universal.
5. Greatly reduce the labor and cost, improve the production efficiency.

Technical Specification

Work object	Staff that can be packed with cartons
Applicable Case Size	L:200~500 W: 150~400 H: 130~450 (mm)
Capacity	8~12 pcs/min
Voltage	AC220V / 50Hz
Tape Width	48/60/72 (mm)
Power	6.5Kw
Air Source	0.6~0.7Mpa
Machine size	2200mmx2200mmx1600mm
