

## PTP Aluminum Foil Blister Packing Machine

PTP aluminum foil blister packing machine can be used for packaging of a lot of products with various specifications such as sugar-coated tablets, plain tablets, capsules and so on. Of course, it can also be used for hardware, electronic components, food with similar shape. PVC film and PTP aluminum foil are used as the packaging materials. In compliance with GMP requirements, this product has the feature of reliable sealing, portability, beautiful appearance, compact structure, high degree of automation, easy installation and maintenance.

### Detailed Specifications

Punching frequency (three gears)	24 times/min, 27 times/min, 33 times/min
Size of packaging product	140x110mm
Standard section of packaging product	56x81.6mm, 2 pieces each time
Productivity	50,000-120,000 Pcs/h
Max. film width	140mm
Max. aluminum foil width	1400mm
Power	4.59KW
Dimension	1850x850x1450mm
Weight	600kg

As a China-based PTP aluminum foil blister packing machine manufacturer and supplier, Feiyun also provides automatic tube filling and sealing machine, capsule sorting polisher, fully automatic pharmacy capsule machine and medical high purity nitrogen generator, etc.
