

Electronic Pressure Capping Machine

Capping Machine adopts ladder-type lifting cap unscrambling, automatically complete the capping ordering, cap adding, cap pressing. Simple structure, stable action, target to solve the position of the special-shaped bottles, the capping difficult problems.

Features

- Accomplish cap ordering, cap adding, cap pressing automatically
- According to customers different cap, design specialized capping away.
- Equipped with human-computer interface and PLC control system, Ensure more stable operation and easier handling
- Self-diagnose errors and stop working to make alarm at errors and missing bottles, caps. It keeps the working process continuous and inerrant avoids any waste of materials.
- Fully automatic operation, intelligent interconnection with before and after process, good coordination, no need for special operation, saving labor.

Parameters

| | | |
|----------------|-------------|---|
| Applicable | Type | Common caps, protective ring caps, double caps, spring caps, flip caps etc. |
| Capacity | Bottles/min | 30-80 |
| Power | W | 1800 |
| Voltage supply | V | 380V/220V according to customers' requirement |
| Pressure | MPA | 0.6 |
| Net dimensions | mm | 2550*1050*1900 |
| Weight | KG | 650 |
