

High Automation Rotary Linear Capping Machine 6/8 Capping Heads FXX-6B/8B

This is our newly developed capping machine, integrates bottle inlet, cap sort, cap feed, capping, bottle outlet together. Well suitable for diversified caps, also very friendly applicable for anti-theft caps. Caps are grasped and positioned well, harmless to caps during the machine running. Fast speed of machine and high qualified rate of capping, it bears step less adjusting, can reach the international advanced level of similar products.

Electric elements use international famous brand, which ensure the machine's quality and its service lifetime, reasonable structure, superior performance, low voice, friendly environmental.

The surface of this machine has been polished with good looking. It can be well matched with the production line. It is ideal equipment for large and medium factories.

TECHNICAL PARAMETERS:

Item	Performance
Suitable bottles	
Diameter	Φ40mm~Φ100mm
Height	80mm~280mm
Suitable caps	
Height	10mm~35mm
Diameter	Φ20mm~Φ80mm
Power supply	AC 220V; 50Hz
Power	3 Kw
Pneumatic (air-operated) source	0.6 Mpa clean and stable compressed air
Number of capping heads	6 / 8 heads
Production capacity	6000/8000 bottles/hour
Weight	About 1200 Kg
Dimension (L×W×H)	2000mm×1300mm×2400mm
