

Bottle Filling Pressure Plugging And Laminating Machine

This equipment is our independent research and development automatic filling and plugging and laminating machine. It is controlled by gas and electricity and PLC system, and it is easy to operate. The equipment is fully compliant with GMP production specifications. Widely used in vials, freeze-dried powder, uric acid, essence, essential oils and other products.

Technical Parameters:

Production capacity: 18~35 bottles/min

Filling range: 10~100ml

Filling method: servo piston / peristaltic pump / ceramic pump

Filling accuracy: $\geq \pm 0.3\%$

Power source: 220/380V 50HZ

Machine power: 1.5KW

Air pressure: 0.6~0.8Mpa
