

Auto Filling Capping and Labeling Machine

This automatic filling capping and labeling machine is a full production line machine to pack. Auto filling capping and labeling machine is widely used for filling bottles and jars of different volumes, shapes and materials. It can be customized according to the requirements of our customers. We can also add it with capping machine, labeling machine, even some other processing equipment to make it a complete production line.

Features:

1. The filling capping and labeling machine frame, components and shell are mainly made of high quality steel, beautiful appearance, easy to Clean, and meet the GMP requirements;
2. Filling capping and labeling machine frame adopts four-wheel clamping rotation, the structure is simple and reasonable, the performance is stable and reliable, and the working efficiency is high. The twist-type screw cap technology effectively solves the drawbacks of the traditional capping machine such as cap skidding, broken, etc;
3. Capping mechanism spacing, height can be quickly adjusted, can adapt to different specifications of the bottle and cap.

Technical parameter:

Type	Screw type
Application	Liquid soap, Food, Cosmetics, Medicals etc.
Bottle and cap application	Various round or square bottles, suitable for screw cap, pump head etc.
Capping speed	20-50 bottles/min
Conveyor belt speed	Frequency converter adjustment (connected with filling machine in line)
Power	500W
Dimensions(L*W*H)	680*700*1650mm
