

AFS-2 Ampoule Filling Sealing Machine (2 filling head)

Apply sample trial and mass production in pharmaceutical industry, ampoule filling and sealing in the condition of sterile.

The machine is two position stepping transmission system, a group of two ampoules enter each position each time, complete send bottle separately, filling nitrogen before, filling liquid, filling nitrogen afterwards and pre-heating, sealing etc process.

The machine was used in Pharmaceuticals, Chemicals and Cosmetics industry.

Technical parameter:

Ampoule specification	1ml ,2ml,5ml ,10ml,20ml
Capacity	2200-4200 pcs/h
Material	304 stainless steel
Total power	0.37kw/380v50Hz
Sealing(fuel) gas	city coal gas, water gas or acetylene , PLG
Dimensions	1500x700x1400mm
Weight	150kg
