

## *GZJ-100A Tube Filling and Sealing Machine*

For medicine, cosmetic, food, fine chemicals and other fields of packaging products. Such as: dermatitis flat ointment, hair dye, paint, toothpaste, shoe polish, adhesive and other materials filling the end of the filling.

### **Structure:**

The use of plunger, filling accuracy, measurement error of less than 2%, no drip, speed, for the two-way equivalent, is the most advanced horseshoe-shaped institutions, the end of the beautiful, simple operation, irrigation, seal once completed, and thoroughly To solve the production process in the ubiquitous drawing, and the closure of the tail after the common problem of leakage. For special industries and the installation of gas protection devices to prevent the material after packaging in the transport and storage process caused by curing phenomenon.

### **Technical Parameters:**

Model	GZJ-100A
Voltage	220V ± 10%50Hz
Working temperature	5~ 50℃
Filling range	10-150ml(can be customized )
filling accuracy	<2%
Power	1.1kw
Working speed	30-50pcs/min ( adjustable )
Working pressure	0.6-0.7Mpa
Machine size	1000mm*600mm*1700mm
Machine weight	450kg
