

NJP-420, 700, 820B/C/E Automatic Capsule Filling Machine

This model is an intermittent motion and hole plate type filling full automatic capsule filling equipment. It adopts optimization design for meeting the characteristics of Chinese medicine and the requirement of GMP. It has the characteristics of compact mechanism, small volume, lower noise, precision filling dosage, multi-function, stable running etc. It can finish the following motion at the same time; capsule feeding, capsule separating, powder filling, capsule rejecting, capsule locking, finished capsule discharge and die whole cleaning etc. It is the most ideal hard capsule filling equipment for pharmaceutical and healthy food industry.

Technical Parameters:

Model	NJP-420 B / C / E	NJP-700 B / C / E	NJP-820 B / C / E
Filling Dosage Form	Powder, Pellets		
Capsule Size	000#, 00#~5# and Supro A~E		
Max. Output	25200 Capsules/Hour	42000 Capsules/Hour	49200 Capsules/Hour
Motor Powe	1.87kw		
Power Supply	AC 380V; 50Hz		
Noise	≤75dBA		
Vacuum Degre	-0.02~-0.06 Mpa		
Compressed Air (clean segment)	Air consumption: 3m ³ /h Pressure: 0.3~0.4 Mpa		
Number of Die Holes	3	5	6
Dimensions	810×945×1930mm		
Weight	800kg
