

PZC-600 Automatic Incasing Machine

The PLC and touch screen system are used in this series of box packers, which makes the operation settings simple, such as setting the number of layers and the form of paper for each box, which can be directly entered on the touch screen. The number of layers can be set to single or multiple layers.

The paper loading mode can be set to place a piece of paper on the bottom of the box and the top layer of materials, or a piece of paper on each layer of materials. Due to the simple setting and various forms, this device becomes more flexible and humanized in the actual operation process.

Because this series of full-automatic cartoners can load materials and paper at the same station, the whole machine is compact in structure and novel in concept.

As the mechanisms of this series of automatic cartoners are adjustable, one machine can meet the requirements of multi-specification carton.

Technical Data:

Motor	PZC-600
Power of supply	AC 220V 50Hz, 0.6kW
Max.Packaging size	500x500x500mm
Min.Packaging size	250x250x300mm
Packing speed	1-8cases/minute (Depending on the actual situation)
Air consumption	0.4-0.6Mpa
Weight	500kg
Outline dimensions	2850x1150x2200mm

Notes: If any change of data, we will not notify further.
