

Capsule Polishing Machine JFP-B

The JFP-B series capsule polishing machine has a dual function of capsule polishing and lifting. The inlet can be connected to any type of capsule filling machine. The outlet can be connected with the capsule sorting device and the metal inspection machine to realize the continuous production mode of polishing, lifting, sorting and testing. The machine adopts a number of new technologies and ergonomic design concepts.

Specification

Model	JFP-B
Applicable Capsule Size	00# 0# 1# 2# 3# 4#
Max. production efficiency	300 000 Capsules Per Hour
Entry level	730mm
Export highly	1050mm
Power indicator	1PH 220V/110V 50Hz/60Hz 0.2KW
Air compression	0.3m ³ /min 0.3Mpa
Vacuum	0.3m ³ /min -0.014Mpa
Overall dimensions	740x510x1500mm
Weight	75KG
