HYTB1-800P Automatic Cold Wet Glue Labeling Machine

Full Automatic Wet Cold Glue Labeling Machine is applicable to all kinds of objects on round bottles paste labeling, separation, gluing, labeling, covered labeled automatically, reducing manual labeling process, improve labeling efficiency. Coating evenly with filamentous stripes, do not wrinkle, improve packaging grades. Linear paste bottle labeling machine can work independently or connect with automatic production line. Suitable for plastic bottle, glass bottle and metal column shape container etc. The height has no limited for regular container, label material is paper with normal printing. Label glue can apply chemicals synthetic glue or starch paste as label glue material. All key parts apply import original parts. For the similar container and label, no need change any parts, just making some adjustment can begin production.

Automatic Wet Cold Glue Labeling Machine is suitable for labeling middle and small batch production, such as food, Chemical, Medicine, Farm Chemical and other labeling.

Main technical data

- Suitable bottle size: $\varnothing 30\text{mm} \sim \varnothing 100\text{mm}$
- Labeling speed: ≤ 100 Bottles/min (related to bottle size)
- Labeling accuracy: $\pm 1\text{mm}$ (not include bottle and label accuracy error)
- Label length: 50-285mm
- Labeling height: 40-150mm
- Power supply: AC220V/110V, 50Hz/60Hz customized
- Total power: 1.2Kw
- Machine dimension: 2800X1200X1400mm
