

## *Auto-Photoelectric Counting Packaging Machine*

Auto-photoelectric counting packing machines used by electromagnetic vibration plates, the motor drive discs rotate to automatically bring the drug into the bottle. It is convenient and fast to replace the counting disks of different specifications and models, without another adjustment. Auto-photoelectric counting packing machines is the advanced, attractive appearance, and economical bottled and bagging equipment in counting machinery.

### **Product Features:**

1. Different vibration design: less noise, better vibration effect.
2. Improved the slope of the hopper, no longer rely on the baffle to block the excess drugs, to solve the disadvantage of blocking with the baffle is easy to break the drugs.
3. Increase depth of hopper to allow more material.
4. Special design, the operator can easily observe and confirm the accuracy of several particles.
5. Bottle speed is fast, up to 20 bottles/min.
6. High gloss number of grain holes, more beautiful, faster feed, better counting accuracy.
7. The whole machine design is more beautiful, using 304 stainless steel materials, scientific design, simple, easy to use.

### **Application**

It is suitable for pharmaceutical, hospital, food, and other industries, for capsules, tablets, particles, and other drugs or food counting. It is the ideal special equipment for the count of bottled, bagged, and canned products in the relevant industries.

**Product Parameters:**

Product name	Auto-photoelectric counting packing machine
Productive power	10-20 bottle/min
Filling material	Capsules, soft capsules, Shaped tablet, sugar-coated tablet
Capacity range	2-9999 granule / sheet, adjustable
Power supply	AC110/220V, 50-60HZ, 0.5KW
Bottle mouth	10-500 ml, Round bottle, square bottle
Accuracy rate	99.7% up
Machine size	1380*670*1550mm
packing measurement	1480*780*1600mm
Net weight	180KG
Remark	Production speed is related to drug variety, size, bottle specification, bottled volume
