

NJP-200 Full Automatic Capsule Filling Machine

NJP-200 automatic capsule filling machine is a substitute of the semi-automatic capsule filling machine. It can be applied in hospitals, medical research institutes, laboratories, colleges and universities, small pharmaceutical factories and health care plants and is therefore deeply favored by clients.

Technical Parameter:

Model No.	NJP-200
Capacity	200 capsules/min
Filling type	Powder, Pallet
No. of Dose/holes of each mold	2
Suitable for Capsule	00#, 0#, 1#, 2#, 3#, 4#
Filling error	$\pm 3\% - \pm 4\%$
Noise	$\leq 75\text{dB (A)}$
Voltage	380V 50Hz 3P
Total Power	3.75Kw
Overall Weight	600Kg
Gross Weight	650Kg
Machine Dimension	750mm. (L) x 680mm(W) x 1700mm(H)
Packing Dimension	1600mm. (L) x 1050mm(W) x 1900mm(H)
