

## *DXG Automatic Single Head Capping Machine*

DXG automatic single head capping machine is mainly used for screw caps of various round plastic caps, aluminum caps, and iron screw caps screwing. It is an ideal bottles capping machine in the food, pharmaceutical, cosmetic, pesticide, cosmetics and other industries.

The machine adopts the frequency converter controlling, the cam principle of transmission machinery application, the positioning of the disc divider, and the implementation of the screw cap of the circular screw cap. Automatic covers placing and capping, capping does not hurt the caps with magnetic assembly structure. Capping head is easy to disassemble, and different caps and bottles just replace a few parts. You can use more than one machine, which can be equipped with automatic filling machine, labeling machine to connect production line.

### **Parameters:**

Capping heads	1 head
Voltage	AC220V
Rated power	1KW
Caps size	Φ15-100 mm
Bottle size	Φ35-Φ130 mm
Bottles height	50-320 mm
Capping speed	10-60 bottles/min
Machine powder	0.55KW
Machine size	150*80*160cm
Weight	280kg
