

SP-SG Automatic Locking Capping Machine

SP-SG automatic locking capping machine is designed with special structure for screw sealing. Three-knife sealing has stable operation with good sealing feature. This machine adopts frequency converter controlling, transmission mechanism applying cam principle, disc divider positioning, easy operation, stable and reliable operation. Capping does not hurt lids, capping heading easy to dismantle. The different lids can be adjusted and can be used universally.

SP-SG automatic locking capping machine is widely used in the production of metal anti-theft caps, plastic anti-theft caps, screw caps, aluminum caps and nozzle caps, roll screw, screw caps, etc., and can be connected to the filling machine, labeling machine production, food, beverage, The best equipment for pharmaceutical, daily chemical, chemical and other industries.

Technical Parameters:

- Applicable caps: various round shape caps
- Bottle range: height 35 ~ 320mm
- Cap Range: Capping $\Phi 12 \sim \Phi 35$ mm
- Capping speed: 0-35p/min.
- Voltage: 3-phase 380v, 50/60HZ
- Power: 1.2KW
- Dimensions: 1700×700×1600mm
