

## *Automatic Double Nozzles Filling Machine LM-ZDGT-B*

PLC Controlled Paste Filling Machine with Bottle Unscrambler adopts PLC and human machine interface technology. Match photoelectric tracking switch imported from Korea. The machine integrates electric and pneumatic functions into one, with reasonable design, stable performance, accurate quality, glass table surface, automatic bottle feeding, and steady operation without noise, electric speed control to the filling speed and filling volume, convenient maintenance and cleaning. The new type filling equipment is the best choice for the realization of automatic production.

### **Material Information:**

80% of the main parts of our products are provided by world famous suppliers.

### **Equipent Charcteristics:**

- Wide suitability
- High filling accuracy
- Labor saving
- Easy to use and maintain

### **Technical parameter:**

Filling volume: 5-150 30-500 60-1000g  
Filling Speed: 20-40 B/min  
Material: stainless steel 304 & 316L  
Usage: high viscosity products, hair wax, honey, etc.  
Function: piston filling  
Material hopper: 45L  
Suitable bottle size: ≤100mm height
