

DPB-420 Flat-plate Soft (Hard) Plastic Blister Packing Machine

DPB-420 suitable for package of many sensitive anti-pollution materials and medical apparatus and instruments, Chinese and western medicine, electronics, chemical product and foodstuff.

Features:

- 1) Stepping or servo motor with chain to be traction device, adjustable stroke.
- 2) Equip with cursor device to ensure the packing pattern locate well and truly.
- 3) The position of printing and slitting could be adjust freely.
- 4) Mould located by male pin, convenience of changing mould. Note: It could be equipped with printing device with cursor.

Main technical parameters:

Capability(times/minute)	6-16 (1) 20 syringe needles/time (2)1ml 11 injectors/time, 2.5ml 10 injectors/time, 5ml 9 injectors/time, 10ml 8 injectors/time
Packing Frequency:	6-16 times / min
Package Materials:	Paper-plastic, Aluminum-plastic, Plastic-plastic and other Compound Film suitable for heat sealing(or the hard plastic less than 0.2mm), width of upper film is 400mm and the lower is 420mm.
Maximum inner dimension(mm)	375 _i Á154 _i Á50mm (L _i ÁW _i ÁD)
Out Dimensions:	5000 _i Á980 _i Á1860mm (L _i ÁW _i ÁH)
Power(kw):	9.5kw
Weight(kg):	1700kg
