

Transparent Bopp Film Soap Wrapping Machine LGB-300A

This transparent Bopp film wrapping machine is kind of good machine for packing soap. Our company's packaging machine is based on the original, using advanced foreign equipment, after careful design and transformation, produced a simple and advanced packaging machine.

Introduction of Tranparent Bopp Film Wrapping Machine

This bopp film wrapping machine is a fully automatic three-dimensional packaging machine. This machine can support single-box packaging, or it can support full-line packaging after connecting to the case packer, code printer and other related equipment. Transparent Bopp Film Soap Wrapping Machine is made of BOPP film and PVC material and can be used for folding packaging rectangular box. During the packaging operation, it can automatically feed, pack, fold, side seal, form up and down, count, and have a self-adhesive safety function.

Application Of Soap Bopp Film Wrapping Machine

This transparent Bopp film soap wrapping machine is equipped with a U-shaped cutter, and the packaged product is easy to open and easy to disassemble.

Bopp film wrapping machine is the best fully sealed device that can replace the traditional heat shrinking machine. It has the advantages of dustproof, moisture proof, anti-counterfeiting and anti-pollution.

It can mark the company's various color logos and names on the safety tear strip with anti-counterfeit laser and phosphorescence. This is one of the best anti-counterfeiting methods, and it adds value to the product, which is very suitable for high-end label product packaging.

This is an ideal choice for wrapping box. Transparent film wrapping machine is widely used in soap, cosmetics, food, health care products, medicine, agricultural and sideline products, audio and video products, stationery, high-end gift packaging and other industries of single-box three-dimensional transparent film packaging.

Technical Features Of Transparent Bopp Film Soap Wrapping Machine

Transparent film wrapping machine is balanced by the sprocket and chain drive, and the product can be pushed into the interior through the machine, effectively avoiding the jamming and casting of the box. And equipped with gear chain and frequency conversion system, stable operation, low failure rate, fast speed and simple operation. Our packaging machines are small in size and light in weight. The area of the packaging area is unlimited and can be used for packaging of different sizes.

Technical Data:

Model	LGB-300A
Wrapping material	BOPP heat sealing film
Packing speed	30~50 bags/min
Packing size	L(50-220mm)*W(20-130mm)*H(10-70mm) mm
Power	220V50HZ
Total Power	4.5KW
Weight	750Kg
Dimension	2100*750*1550MM
