

## *Multi-Column Packing Machine*

According to the thermal seal working principle, a motor of a multi-column packing machine can control pull film, pull bag fast and stable. The high-sensitivity photo induction switch can automatically track the positioning printed cursor, and obtain a complete trademark pattern when packaging the colored target packaging materials. Multi-column packing machine is a convenient adjustment with an integrated support frame. The complete machine is made of 304 stainless steel and aluminum alloy.

### **Product Features**

1. By using PLC control, the machine has functions of photoelectric tracking and correcting the crook;
2. Precisely automatically adjust the length of the bag;
3. The problems will be shown on the operational screen, convenience for checking and maintenance;
4. Automatically stop when overheated, ensuring the quality of sealing;
5. Conform to the GMP industrial standard, and it has stable performance, convenient operation and maintenance, and high efficiency;
6. Multi-column back seal, multi-column four-sided seal.

### **Application**

It is suitable for liquid: shampoo, cream, oil, sauce, jelly, paste.

## Product Parameters

Product name	Multi-column packing machine
Type of product	6 Lanes Machine / 12 Lanes Machine
Model	GF-680L
Filling	Volume cups
Bag style	Stick sachets
Dosage	1-30m/bag
Bag size (mm)	L30-140 Single lane film width: 30-60mm
Capacity (bags/min)	30-40 times / Pin min
Control style	PLC+Chinese / English screen
Pneumatic request	0.24 cbm / min, 0.6Mpa
Power	3.8KW
Voltage	Ac380V 3 phases 50Hz
Body shell	Sheet steel spray painted 1 Stainless steel
Weight	G.W430KG
Dimension(LWH/cm)	(L)200x(W)180x(H)260mm
