

Water Bottling Machine CGF16-16-5

Product Description:

1. The CGF washing, filling, capping machine

The machine combines washing, filling and capping three functions in a body, the whole process is automatic, suitable for PET bottle, plastic bottle filling mineral water and pure water. Filling way using the gravity or micro pressure filling, make the speed is faster and more stable, so with the same model our machine output is higher and more efficient. The machine adopts advanced Mitsubishi programmable controller (PLC) to control the machine to run automatically, interworking with inverter running more stable and reliable. the photoelectric sensor detect all part running state, with high degree of automation ,easy operation.

2. Machine components

1	Motor电机	ABB/Switzerland瑞士
2	Electric protection switch电器保护开关	Schneider/Germany施耐德/德国
3	Circuit breaker 断路器	Siemens/Germany西门子/德国
4	PLC可编程控制器	Mitsubishi/Japan三菱/日本
5	Touch screen 触摸屏	Siemens/Germany西门子/德国
6	Transducer 传感器	Turck/Germany图尔克/德国
7	Photoelectricity switch 光电开关	Banner/USA 邦纳/美国
8	Pneumatic element 气动元件	Festo/Germany费斯托/德国
9	Contactora接触器	Siemens/Germany西门子/德国
10	Converter变频器	Mitsubishi/Japan三菱/日本
